

TRUE HEALTH NEW MEXICO MEDICAL DRUG CHANGES

This document describes changes to the True Health New Mexico Medical Drug coverage **effective April 1, 2018**. Beginning **April 1**, True Health New Mexico will change how the following infused drugs are managed through the medical benefit.

- Drugs in the following categories will be split into preferred and non-preferred categories: acromegaly, autoimmune, botulinum toxins, colony-stimulating factors, antihemophilic factor products, hyaluronates, multiple sclerosis, alpha-1 proteinase inhibitors, hereditary angioedema, and Gaucher disease.
- For all new-start patients, preferred agent(s) should be used first-line.
- Please note: Existing authorizations will continue to be recognized. and patients stable on current therapy will not be required to change medication.
- This program is specific to drugs billed on the medical benefit and does not affect the pharmacy benefit.
